

February 26, 2008 Council Report

First, I would like to thank all the residents for coming out tonight, I think it shows that the residents really want to be kept informed on what is going on in the community, really want to become involved, and heard.

I only have two items of interest tonight, one involves the property behind Ashley Crossing, I want to thank Jeff Hatcher and Hugh McCurley for working on getting the property management company at Hartford Corners to clean up all of the trash that was dispersed throughout the brush behind Lowes.

Also, we are having our township engineer look at the basins behind Lowes that are filled with debris and sludge and having him work with the property management company to get them fully operational.

Second, I am planning on meeting with the Township Engineer, the Summer Hill Association President and the management company one last time to address any drainage issues on properties that were directly affected by the inclusion of the Miller's Run Development. I will be asking the residents of the properties affected to meet with us as well.

Thank you
