

Good Evening.

Tonight I would like to mention a few ongoing issues.

**First**, while I was visiting the residents of Ward 2, I assured them that I would make every effort to both keep me “in the loop” on issues that involved them and to include them in the process before any decisions were made.

Since I was the only member of council that insisted that we meet with residents of the Bridgeboro section of town regarding the redevelopment plan being considered by council, I am heading up a meeting to discuss the plans we are considering with any interested residents. That meeting is Nov. 8th here at the Municipal build at 7:00PM.

**Second**, since the rest of council is not interested in supporting my efforts to secure scholarship money from local businesses for Delran students, I have begun to investigate the formation of a nonprofit organization. The members of the organization will be local citizens that have expressed an interest in helping with this effort.

We have contacted an attorney to start the process. I will keep you informed of our progress.

I also spoke with Lyn Jenney, the President of the School Board and ensured him that I will encourage business to continue to contribute monies to the schools as well.

**Third**, several people have expressed an interest in seeing both the minutes from the Sewerage Authority meetings and the contact information for the authority members on the Delran Township website.

Since, Mr. Ogozalek is on the Sewerage Authority, I would like to formally request that he bring this to the Authority and let me know if and when they will be able to provide this information to the citizens of Delran.

**Finally**, I am still pursuing the investigation of three troubling issues that are requiring much more time to resolve than I could have imagined. I am still very concerned that nepotism is being allowed with some of the people on Council regarding township positions. While my fellow councilmen have indicated that they don't believe there is a problem. **I do!**  
I am still pursuing this.

Also, I have been stonewalled in my pursuit of the details of the title trail for what is referred to as Section 12 of Summerhill. Tax maps are missing, there appear to be records of double tax payments and breaks in the ownership trail of this parcel. No one seems to want to assist in the investigation. Again, I have contacted an attorney to investigate this matter and I am waiting for his response.

Every issue that is brought to my attention will be investigated to the best of my ability.

I will continue to speak my mind and make every attempt to voice the concerns of the residents of Delran to this council.

Thank you very much.
